## PERSONAL PROJECTS

Employee Monitoring System (Final Year Project)  
(2021 - 2022)

- ur project monitors all the employees sitting on their seats via Face Recognition and if they leave their seat for more than 5 minutes then model will send notification to that employee to get back and also send notification to his manager informing the employee is not on his seat. Computer Vision + Firebase + React Native App

Artificial Intelligence Project

- azon Sentiment Analysis with Wordcloud Numpy Pandas Tensorflow (Github). Used Pretrained models as Haascascade and LBPH for recognitions and detections.

Website Development

- Have created multiple responsive and friendly websites using HTML, CSS, JS, JS6, React, Typescript GraphQL DynamoDB (Available on Github)

Mobile Application Development

- Simple Alert App integrated with firebase (Available on Github) Also make an App on Flutter(Dart)

Desktop Application using C#

- Created many desktop Management System apps on c# windows form with sql server management
